NAJIB EL KHADIR

GAMEPLAY & AI PROGRAMMER

An experienced professional passionate about software development, artificial intelligence, and video games, as well as their ethical and philosophical aspects. I aim to enhance my skills and align my career with my true calling: video games programming.

EDUCATION

● **Master's Degree in Video games Engineering** 2024 - 2025
GAMAGORA - Lumière Lyon 2 University

● **Master's Degree in Computer Sciences & AI** 2020 - 2021
Lyon 1 University

EXPERIENCE

● **Software Engineer** 2022 - 2024
Sopra Steria Lyon - **Java** / **REST** / **Oracle** / **Spring** / **Jenkins**

- Handled detailed and internal specifications, development, unit and integration testings
- Delivered bug fixes and ensured lifecycle maintenance of the software
- Contributed to software evolution through API integration

● **Research Intern** 2021
LIRIS CNRS Team SyCoSMA - **PyTorch** / **Numpy** / **Matplotlib**

- Contributed to the Ethics.AI research project (ARA region) through the enhancing of a Smart Grids simulator
- Completed a master thesis on comparing and implementing DRL algorithms in a multi-agent system

● **Assistant IT Manager** 2017
genOway Lyon - **PowerShell** / **UML** / **Sharepoint**

- Designed and developed the company's intranet architecture, drafted specifications, managed IT assets and crisis protocols.

PROJECTS

Audio-Reactive Boids-Based VJing tool using **Godot**
Self-driving reinforcement learning agent in **Unity**
USD vs The World - Shmup Game made using **Unity**
